

Risk Treatment Plan

Veltrixa ApS

Document ID	PLAN-RTP-001	Version	1.0
Owner	ISMS Owner	Approver	CEO
Effective date	26 July 2026	Next review	26 July 2027
Classification	Internal / Portfolio	Status	Approved for portfolio use

Portfolio note. This document is an illustrative ISMS artefact for the fictional company Veltrixa ApS. It demonstrates ISO/IEC 27001:2022 implementation logic; it is not evidence of certification or live operational performance.

1. Plan

The following actions reduce residual risks or close partial control implementation. Completion must be supported by the named evidence and followed by residual-risk reassessment.

ID	Risk	Action	Owner	Due	Acceptance evidence	Status
T-01	R-01; R-12	Complete just-in-time privileged access and quarterly access certification.	Head of Engineering	30 Sep 2026	Approved design; implementation; access-review record; test evidence	In progress
T-02	R-03	Deploy cloud configuration policy-as-code and alerting for public exposure.	DevOps Lead	31 Aug 2026	Baseline; pipeline rule; alert test; remediation ticket	In progress
T-03	R-08	Complete critical-supplier assurance review and documented AWS exit/recovery scenario.	ISMS Owner	31 Oct 2026	Assessment; contract review; dependency map; tabletop record	Planned
T-04	R-06	Run role-based awareness training and phishing simulation; address repeat failures.	People Operations	30 Sep 2026	Attendance; results; follow-up actions	Planned
T-05	R-10	Validate monitoring coverage and incident-alert routing against critical scenarios.	DevOps Lead	31 Aug 2026	Coverage matrix; alert test; on-call evidence	In progress
T-06	R-11	Implement automated retention/deletion checks for customer content and logs.	Privacy Lead	30 Nov 2026	Retention rules; job logs; exception review	Planned
T-07	R-02; R-07	Perform quarterly restore and service-recovery exercise against RTO/RPO.	DevOps Lead	30 Sep 2026	Exercise plan; results; recovery timings; lessons	Planned

2. Governance

- The responsible owner updates status monthly and escalates forecast delay before the due date.
- The ISMS Owner verifies evidence and coordinates residual-risk reassessment after completion.
- Material changes to scope, due date or treatment require risk-owner approval; High residual-risk extensions require CEO approval.
- Closed actions remain traceable to supporting records and the updated risk register.
