**Portfolio note.** This document is an illustrative ISMS artefact for the fictional company Veltrixa ApS. It demonstrates ISO/IEC 27001:2022 implementation logic; it is not evidence of certification or live operational performance.

## 1. Meeting details

| Field        | Record                                                                |
|--------------|-----------------------------------------------------------------------|
| Date         | 24 July 2026                                                          |
| Chair        | CEO                                                                   |
| Participants | CEO, ISMS Owner, Engineering Manager, DevOps Lead, People Operations  |
| Purpose      | Review continued suitability, adequacy and effectiveness of the ISMS. |
| Status       | Illustrative portfolio record                                         |

## 2. Review inputs

| Input                                | Evidence / discussion                                                                                         | Conclusion                                           |
|--------------------------------------|---------------------------------------------------------------------------------------------------------------|------------------------------------------------------|
| Previous actions                     | First formal review; no previous management-review actions.                                                   | Noted                                                |
| Changes in context / requirements    | Growing enterprise-customer assurance needs; increased reliance on critical cloud suppliers.                  | Supplier assurance and evidence quality prioritized. |
| Performance trends                   | MFA target met; treatment completion below target because three actions remain open; recovery test scheduled. | Continue monthly tracking.                           |
| Nonconformities / corrective actions | NC-01 raised by Q2 audit; one improvement opportunity open.                                                   | Corrective action approved.                          |
| Monitoring and measurement           | No severity-1 incidents in the illustrative period; alert coverage test incomplete.                           | Complete T-05 by 31 Aug 2026.                        |
| Audit results                        | One minor nonconformity, one opportunity for improvement and one                                              | Report accepted.                                     |

| Input                     | Evidence / discussion                                                                 | Conclusion                       |
|---------------------------|---------------------------------------------------------------------------------------|----------------------------------|
|                           | conformity.                                                                           |                                  |
| Objectives                | OBJ-01 on target; OBJ-03 and OBJ-06 awaiting scheduled evidence; OBJ-05 below target. | Owners to report monthly.        |
| Risk status               | R-01, R-03 and R-08 remain residual High pending treatment.                           | Time-bound acceptance confirmed. |
| Interested-party feedback | Prospective customers request clearer supplier and recovery assurance.                | Prioritize T-03 and T-07.        |
| Improvement opportunities | Introduce evidence index and automated reminders for owners.                          | Approved for Q3 planning.        |

### 3. Decisions and actions

| Action                                                                    | Owner       | Due         | Decision / resource                     |
|---------------------------------------------------------------------------|-------------|-------------|-----------------------------------------|
| Close NC-01 by adding traceable review evidence and verify effectiveness. | ISMS Owner  | 31 Aug 2026 | Approved; two working days allocated.   |
| Complete cloud configuration monitoring action T-02.                      | DevOps Lead | 31 Aug 2026 | Approved tooling and engineering time.  |
| Complete supplier assurance and recovery scenario T-03.                   | ISMS Owner  | 31 Oct 2026 | Approved; procurement support assigned. |
| Run recovery exercise T-07 and report achieved RTO/RPO.                   | DevOps Lead | 30 Sep 2026 | Approved.                               |
| Add an evidence index to SoA v1.1.                                        | ISMS Owner  | 30 Sep 2026 | Approved as improvement.                |

### 4. Overall conclusion

Management concludes that the ISMS design remains suitable and adequate for the defined portfolio scope. Effectiveness cannot be fully demonstrated until planned operational evidence and corrective actions are completed. No change to scope or policy is approved. Residual High risks remain accepted only until the stated treatment deadlines.
