

Corrective Action Register

Veltrixa ApS

Document ID	REG-CAR-001	Version	1.0
Owner	ISMS Owner	Approver	CEO
Effective date	26 July 2026	Next review	26 July 2027
Classification	Internal / Portfolio	Status	Approved for portfolio use

Portfolio note. This document is an illustrative ISMS artefact for the fictional company Veltrixa ApS. It demonstrates ISO/IEC 27001:2022 implementation logic; it is not evidence of certification or live operational performance.

1. Register

ID	Source	Nonconformity	Root cause	Correction / corrective action	Owner	Due	Status	Effectiveness review
CA-01	NC-01 / Q2 internal audit	Risk reviews lacked a consistently retained approval record.	Methodology specified frequency but the register had no review-evidence field or mandatory approval workflow.	Add review date, reviewer, evidence link and approval field; update methodology and test on four risks.	ISMS Owner	31 Aug 2026	Open	Sample four completed reviews and confirm traceability by 15 Sep 2026.
CA-02	Objective OBJ-05 below target	Several actions were forecast to miss the planned internal milestone.	Owners received no automated reminder and status escalation was informal.	Introduce monthly action review and reminder workflow; document escalation rule.	ISMS Owner	15 Sep 2026	In progress	Two consecutive monthly reviews show ≥90% on-time forecast.

2. Closure rule

An action is closed only when the immediate issue is controlled, the root cause has been addressed, required changes are implemented, evidence is retained and an independent or appropriately objective reviewer confirms effectiveness. Ineffective actions are reopened or replaced.
