DATA PROTECTION IMPACT ASSESSMENT

Fillable working template | EDPB 2026 structure

Original presentation. EDPB fields and section sequence.

Reference: EDPB Template [2026] for Data Protection Impact Assessment, version 1.0, 10 March 2026, and accompanying Explainer.

0 OVERVIEW OF THE PROCESSING

0.1 Controller(s)

Note: If there are Joint controllers, one table per controller, adding a row to identify their obligations and tasks

Controller	Nordcenter ApS
Management units responsible for the processing inside the organisation	Management, Facility Management, Security Team and IT Administration
Main establishment/point of contact or representative	Aarhus, Denmark – Nordcenter ApS. Contact details: Not specified in the case study.
Information about the DPO or similar function, if applicable	Privacy / Compliance function. A Privacy Analyst has been assigned to conduct the DPIA. No designated DPO is identified in the case study.

0.2 Processor(s) and sub-processor(s)

Click here to enter information	**Processor**	**Definition of their obligations and tasks**
1	SecureVision ApS	Processes personal data on documented instructions from Nordcenter ApS. Responsible for installation, configuration, maintenance, system updates and troubleshooting of the CCTV system. May access stored video recordings temporarily when necessary for technical maintenance or troubleshooting.

0.3 Name of the processing

Internal name given to the processing (the given name in the record of processing activities)	CCTV Surveillance of Shopping Centre Common Areas
Current version (explaining the history of changes made to the processing in the past, if any)	Not specified. The CCTV surveillance system is a new processing initiative currently in the planning phase. It has not yet been implemented, and no previous versions or changes are documented.

Unresolved: The official name in Nordcenter ApS's record of processing activities has not been confirmed.

0.4 Planning of the processing

Estimated launch date	Not specified. The CCTV surveillance system is currently in the planning phase and has not yet been implemented. The launch date requires confirmation with Management.
Estimated end date or expiration conditions (if applicable, i.e. because the processing is temporary)	Not specified. The case study does not identify a planned end date or expiration conditions for the CCTV surveillance system. This requires confirmation with Management.

0.5 DPIA technical sheet

Current version and version log (explaining the history of changes made to the information contained in the DPIA template for this processing, if any)	Version 1.0 – Initial DPIA. No previous versions or revisions.

Team involved in conducting this DPIA (providing details of their roles, tasks, responsibilities, etc.)	The following stakeholders and responsibilities have been identified based on the case study. No actual or simulated stakeholder consultations have been conducted. Their involvement in the DPIA process remains pending. Privacy Analyst: Responsible for conducting the DPIA, identifying and assessing data protection risks, and documenting findings and recommendations. Management: Provides information on the purposes and planned implementation of the CCTV system and reviews the DPIA findings. Facility Management: Provides information on proposed camera locations and physical installation. Security Team: Provides information on operational use of the CCTV system, access to recordings and handling of security incidents. IT Administration: Provides information on technical infrastructure, system architecture and access management. Privacy / Compliance: Provides guidance on applicable data protection requirements and reviews the DPIA for compliance. SecureVision ApS (Data Processor): Provides technical information on the CCTV system, maintenance activities and access to personal data.
Guidelines, standards, codes of conduct and other reference materials used to conduct this DPIA	• *Regulation (EU) 2016/679 (General Data Protection Regulation – GDPR), particularly Articles 5, 6, 25, 28, 32, 35 and 36.* • *European Data Protection Board (EDPB), Template [2026] for Data Protection Impact Assessment (DPIA), Version 1.0.* • *European Data Protection Board (EDPB), Template [2026] for Data Protection Impact Assessment (DPIA) – Explainer, Version 1.0.* • *Article 29 Working Party, Guidelines on Data Protection Impact Assessment (DPIA) and determining whether processing is likely to result in a high risk, WP248 rev.01, endorsed by the EDPB.* • *European Data Protection Board (EDPB), Guidelines 3/2019 on processing of personal data through video devices.* • *Danish Data Protection Act (Databeskyttelsesloven).* • *Danish Act on Television Surveillance (TV-overvågningsloven).* • *Danish Data Protection Agency (Datatilsynet), Guidance on CCTV Surveillance – Private Companies (June 2023).*
Reasons to conduct the DPIA	The planned introduction of a CCTV surveillance system at Nordcenter ApS requires a Data Protection Impact Assessment (DPIA) under Article 35(3)(c) of the GDPR, which specifically requires a DPIA for systematic monitoring of publicly accessible areas on a large scale. The requirement is supported by the following characteristics of the planned processing: • **Systematic monitoring:** The proposed system will use 120 fixed CCTV cameras operating continuously throughout the shopping centre's common areas, including entrances, corridors, atriums and seating areas. • **Large-scale processing:** Nordcenter receives approximately 80,000 visitors per week. The planned surveillance will cover multiple publicly accessible areas and operate continuously, potentially affecting a substantial number of individuals. • **Vulnerable data subjects:** The surveillance will include children visiting the shopping centre and employees working in monitored areas. These groups may be particularly vulnerable in the context of systematic monitoring. • **Potentially sensitive or highly personal information:** Video recordings may reveal individuals' movements, activities and personal circumstances. Depending on the circumstances, recordings may

	incidentally disclose sensitive information. **Conclusion:** The proposed CCTV system constitutes systematic monitoring of publicly accessible areas on a large scale and therefore falls within the mandatory DPIA requirement under GDPR Article 35(3)(c). The DPIA must be completed before the planned processing begins.
Scope of this DPIA (what has been considered and what has been left out of the assessment and why)	The scope of this DPIA, including the processing activities, data subjects, relevant actors, technical dependencies, exclusions and outstanding issues, is documented in the separate *Nordcenter ApS – DPIA Scope Document (Annex A)*. The scope is currently preliminary and pending validation. **Reference:** Annex A – *Nordcenter ApS – DPIA Scope Document*, Sections 1–8.
Completion date	Not yet completed. The DPIA is currently in progress.
Formal validation date (approval of the DPIA as complete and finished by a responsible official)	Formal validation date: Not yet validated. Formal approval of the completed DPIA is pending.
Is the DPIA (or parts of it) intended to be published or to be shared externally?	Yes – for portfolio purposes. The DPIA is intended to be published as a fictional portfolio project demonstrating practical GDPR compliance and risk assessment skills. No real personal data or confidential business information will be included.
